600 Series Installation Chair

LOCATION: \_\_\_\_\_

**ENGINEERING SPECIFICATION:**

POLYCAST® Installation Chair is the most efficient and economical means of setting a precast trench system. The installation chair supports the ends of the channels, aligns and locks the joints rigidly together and prevents the channels from floating. Adjusting channel elevation is easy with the POLYCAST® Installation Chair. One chair is required for every joint. The chair is made of 1018 hot rolled steel with a zinc plated finish and weighs approximately 1lbs [0.45kg].
