HOT BOX®
ENCLOSURES

SPECS MADE SIMPLE

Hubbell offers two design choices for water backflow preventer enclosures. Available in a variety of sizes, each design offers the quality and practicality you expect from Hot Box.

- Reduces excess inventory and lead times. A few enclosure sizes fit a variety of backflows.
- Durable, strong aluminum enclosure is corrosion and UV resistant.
- DuraFold® design allows easy access via hinged or removable sections.
- Insulation will not sag or delaminate from the walls because of a strong chemical bond.
- Protects against freezing conditions with optional, wall-mounted heaters.
- Offers better performance and safety with the heater raised above the discharge point.
- Available in smooth aluminum finish or Federal Brown color.

**NOTE:** For heated model, change first L in part number to H.  
**NOTE:** For Federal Brown color, change last L in part number to M.

### Heat it up!

**Add an integral heater to your Hot Box® enclosure**

Add a heater option to any of these DuraFold enclosures by changing the first L in the part number to the letter H. This heater option comes with appropriate wattage to ensure freeze protection.

## Hot Box - Sectional
